**ASOR Recent Advances— 31<sup>st</sup> March and 1<sup>st</sup> April 2016 — Monash Clayton, and via teleconference**

The **ASOR Recent Advances Conference** is a forum for the exchange of ideas and the promotion of growth and activity in the Australian Optimisation community. It is a conference where presentations on completed academic research are complemented with sessions on interesting and/or novel applied work, the discussion of new research ideas and directions, and research work-in-progress.

**ASOR Recent Advances will run over two days** and be hosted by the Monash University School of Mathematical Sciences, at the Clayton Campus in Melbourne, with support from CSIRO Data61. While attendance in person is highly encouraged, the event will also be teleconferenced across multiple coordinated sites outside of Victoria (site locations and facilities will be coordinated by local ASOR branches and/or CSIRO Data61).

### Presentations

Recent Advances has three presentation formats:

- 45 minute invited keynote talks;
- 20 minutes (plus 5 minute questions) abstract-only full presentations;
- 10 minute lightning presentations, particularly suited to students presenting research in progress.

The abstract for your presentation should be between 150 words and one page, may include diagrams or charts, and can be supplied in plain text, MS Word or Latex formats. Submit your abstract to either [Simon.Dunstall@data61.csiro.au](mailto:Simon.Dunstall@data61.csiro.au) or [Andreas.Ernst@monash.edu](mailto:Andreas.Ernst@monash.edu).

### Key Dates

**23 March 2016.** Deadline for submission of abstracts for presentations.

**24 March 2016.** Deadline for registration.

**31 March 2016 – 1 April 2016.** Recent Advances conference.

### Organising Committee
